

FREE DELPHI AND GLSCENE SOURCE CODES

FOR ELECTRICAL ENGINEERING

(started November 2014)

This is a site for persons like me that develop software only in Delphi language. When we go to Internet, it is easy to find good codes in FORTRAN, C and other languages but not in Delphi

For the ones that want to put the codes here just send me the zipped files and your contact name as written in the two examples below.

RULES:

- a) Only DELPHI codes which may be useful for electrical engineering will be included
- b) Only source codes that someone can freely open, compile and use in Delphi will be included.
- c) Software without the source code will not be included.

Class : ANALYSIS OF FEASIBILITY OF POWER GENERATION, COGENERATION AND T&D PROJECTS		
Software name	Developer or contact name	ZIPPED FILES OR SITE WHERE TO DOWNLOAD
Decidix	Sergio Feitoza sergiofeitoza@cognitor.com.br http://www.cognitor.com.br/en_home.htm	http://www.cognitor.com.br/c_Feasibily_Analysis.htm Download files in SourceForge http://sourceforge.net/projects/decidix/files/?source=directory
Class : SIMULATION OF LABORATORY TESTS		
Software name	Developer or contact name	ZIPPED FILES OR SITE WHERE TO DOWNLOAD
SwitchgearDesign	Sergio Feitoza sergiofeitoza@cognitor.com.br http://www.cognitor.com.br/en_home.htm	
Class : SHORT CIRCUIT CALCULATIONS (like ATPDRAW, SPICE, ...)		
Software name	Developer or contact name	ZIPPED FILES OR SITE WHERE TO DOWNLOAD
Class : POWER FLOW CALCULATIONS (like ATPDRAW, SPICE, ...)		
Software name	Developer or contact name	ZIPPED FILES OR SITE WHERE TO DOWNLOAD
